- Git
- CSS3
- React.js
- Node.js
- Redux.js
- JavaScript
- JQuery
- HTML5
- MongoDB
- Express.js
- Mongoose.js
- User Authentication

PROJECTS

Flashstacks

October 2018 - present

- Designing and developing a full stack application for managing flash cards using MERN stack.
- Implementing a NoSQL database with MongoDB as well as user authentication and RESTful API to retrieve user specific data.
- Managing production code deployments using Heroku.
- Developing back end with Node.js, Express.js, and Mongoose development technologies.

WeatherChecker

November 2018

- Created a front end application providing users with current weather based on the entered city and country.
- The app conducts an AJAX request to the openweathermap API.
- Produced a fully responsive front end application and utilized JavaScripts' fetch request.

FatStacks

September 2018

- Developed a front end application, using React.js, BrowserRouter, Redux, ufc-data-api, CSS3, Axios.
- Utilized CSS keyframes to animate and bring life to the application.
- Performs Asynchronous calls to the API while providing enticing visuals to the user.
